THE WEEK THAT WAS

Market surges on hopes of earnings recovery, global cues

The stock market registered strong gains in the week ended Friday, 19 January 2018 with the two key benchmark indices viz. the barometer index, the S&P BSE Sensex and the Nifty 50 index clocking record closing highs. Optimism of recovery in earnings of India Inc in October-December 2017 quarter coupled with positive global cues lifted sentiment. Strong domestic industrial production data for November also aided market gains.

On the macroeconomic data front, India's industrial production surged at 25-month high pace of 8.4% in November 2017 over November 2016, while showing a sharp acceleration in growth from the 2% increase in October 2017.

India's inflation based on consumer price index (CPI) surged to 17-month high of 5.21% in December 2017 compared with 4.88% in November 2017. The core CPI inflation increased to 4.96% in December 2017 compared with 4.75% in November 2017. The cumulative CPI inflation was lower at 3.25% in April-December FY 2018 compared with 4.85% in April-December FY 2017. Both IIP and CPI data was announced after market hours on Friday, 12 January 2018.

The government on Monday, 15 January 2018 said that India's inflation based on monthly wholesale price index (WPI), eased to 3.58% (provisional) for the month of December 2017 as compared to 3.93% (provisional) for the previous month and 2.1% during the corresponding month of the previous year. Build up inflation rate in the financial year so far was 2.21% compared to a build up rate of 3.71% in the corresponding period of the previous year.

India's exports rose 12.36% to \$27.03 billion in December 2017 over December 2016. Imports rose 21.12% to \$41.91 billion in December 2017 over December 2016. The trade deficit for December 2017 was estimated at \$14.88 billion as against the deficit of \$10.54 billion during December 2016.

Among global news, the trade surplus in the 19 countries sharing the euro expanded in November to its highest point in eight months. The European statistics office Eurostat said the euro zone's surplus in goods trade rose in unadjusted terms to 26.3 billion euros in November, up from 18.9 billion euros in October. It was also higher than the 23.8 billion surplus recorded a year earlier.

In China, the National Bureau of Statistics announced on Thursday, 18 January 2018 that the economy had expanded 6.9% last year, up slightly from 6.7% in 2016 and breaking a trend of gradual slowing that had begun in 2011. For the fourth quarter, it reported growth of 6.8% over a year earlier.

Another data showed that China's industrial output picked up in December. Value-added industrial output, a rough proxy for economic growth, expanded 6.2% in December from a year earlier, compared with a 6.1% increase in November, the National Bureau of Statistics said.

In the US, the Fed's Beige Book indicated that the outlook for 2018 remains optimistic for a majority of contacts across the country. As for the much vaunted tax cuts, only businesses in Chicago and Dallas were excited over the Republican tax plan, while districts along the East Coast were worried about higher taxes from the new limits on deductions for mortgage interest and property and state income taxes, reports indicated.
