THE WEEK THAT WAS

On the macro front, data released on Tuesday, 5 December 2017, showed that the Nikkei India services Purchasing Managers' Index, or PMI, dipped into negative territory in November. The seasonally adjusted business activity index stood at 48.5 in November, off from 51.7 in October. A reading above 50 indicates economic expansion, while a reading below 50 points toward contraction.

On the basis of an assessment of the current and evolving macroeconomic situation at its meeting on Wednesday, 6 December 2017, RBI's monetary policy committee (MPC) decided to keep the policy repo rate under the liquidity adjustment facility (LAF) unchanged at 6%. Consequently, the reverse repo rate under the LAF remains at 5.75%, and the marginal standing facility (MSF) rate and the bank rate at 6.25%. The decision of the MPC is consistent with a neutral stance of monetary policy in consonance with the objective of achieving the medium-term target for consumer price index (CPI) inflation of 4% within a band of +/- 2%, while supporting growth.

The government on Tuesday, 5 December 2017, announced incentives worth a total Rs 8450 crore to boost exports and employment in labour-intensive sectors in the mid-term review of the five-year foreign trade policy (FTP) that was rolled out in 2015.

Export incentives under Merchandise Exports from India (MEIS) have been increased by 2% across the board for labour intensive MSME sectors leading to additional annual incentive of Rs 4567 crore. This is in addition to the already announced increase in MEIS incentives from 2% to 4% for ready-made garments and made ups in the labour intensive textiles sector with an additional annual incentive of Rs 2743 crore.

Further, incentives under Services Exports from India Scheme (SEIS) have also been increased by 2% leading to additional annual incentive of Rs 1140 crore. The FTP will continue to be reviewed and evaluated regularly for addressing concerns of the exporters, simplification of procedures and for promotion of exports, an official statement said.

On the global macro front, activity in China's service sector expanded at a faster pace in November, a private gauge showed on Tuesday, 5 December 2017. The Caixin China services purchasing managers' index rose to 51.9 in November from 51.2 in October, Caixin Media Co. and research firm Markit said.

China's exports and imports unexpectedly accelerated last month in an encouraging sign for the world's second-biggest economy. Exports in November rose 12.3% year-on-year, the fastest pace in eight months, led by strong sales of electronics and high-tech goods, while commodity purchases helped lift imports. Imports grew 17.7% year-on-year in November, the General Administration of Customs said on Friday, 8 December 2017.

Japan's economy grew at a much faster pace than initially estimated in the July-September quarter. The nation's gross domestic product grew at an annualized pace of 2.5% from the previous three months, according to government data released on Friday, 8 December 2017.

UK services PMI was reported at 53.8 in November compared with 55 in October. Eurozone final November composite PMI was reported at 57.5 compared with 56 in October.
