Market Outlook

THE WEEK THAT WAS

Market advances as RBI cuts inflation forecast

Domestic stock markets edged higher during the week after the Reserve Bank of India (RBI) lowered inflation forecast for year ending 31 March 2019 amid higher growth projection as part of its monetary policy review. The Sensex regained the psychological 33,000 mark during the week. Indices edged lower in four out of five trading sessions.

On the macro front, data released on Tuesday, 3 April 2018 showed that manufacturing conditions improved for the eighth consecutive in March, but at the weakest pace since October. The Nikkei India Manufacturing Purchasing Managers' Index (PMI) fell to a five-month low of 51 in March from 52.1 in February.

The output of eight core infrastructure sector, constituting 40.27% of the weight of items included in the Index of Industrial Production, increased 5.3% in February 2018 over February 2017. Its cumulative output moved up 4.3% in April to February 2017-18. The data was announced after market hours on Monday, 2 April 2018.

The Reserve Bank of India (RBI) maintained status quo in its first bi-monthly monetary policy meeting on Thursday, 5 April 2018. On the basis of an assessment of the current and evolving macroeconomic situation, RBI's Monetary Policy Committee (MPC) decided to keep the policy repo rate under the liquidity adjustment facility (LAF) unchanged at 6%.

Consequently, the reverse repo rate under the LAF remains at 5.75%, and the marginal standing facility (MSF) rate and the Bank Rate at 6.25%. The decision of the MPC is consistent with the neutral stance of monetary policy in consonance with the objective of achieving the medium-term target for consumer price index (CPI) inflation of 4% within a band of +/- 2%, while supporting growth, the RBI said.

The RBI raised growth outlook as several factors are expected to accelerate the pace of economic activity in 2018-19. There are now clearer signs of revival in investment activity as reflected in the sustained expansion in capital goods production and still rising imports, albeit at a slower pace than in January. Global demand has been improving, which should encourage exports and boost fresh investment. On the whole, GDP growth is projected to strengthen from 6.6% in 2017-18 to 7.4% in 2018-19.

The RBI lowered its inflation projection H1:2018-19 to 4.7-5.1% and 4.4% in H2, including the HRA impact for central government employees, with risks tilted to the upside. Excluding the impact of HRA revisions, CPI inflation is projected at 4.4-4.7% in H1:2018-19 and 4.4% in H2.

India's services activity rebounded in March, driven by a marginal rise in new businesses, data released on Thursday, 5 April 2018, showed. The seasonally adjusted Nikkei India Services Business Activity Index rose to 50.3 in March from 47.8 in February. A reading above 50 indicates economic expansion, while a reading below 50 signals contraction.

On the global front, the service sector in China continued to expand in March, albeit at a slower pace, the latest survey from Caixin revealed with a services PMI score of 52.3, down from 54.2 in February.

China's manufacturing activity expanded at its weakest pace in four months in March, a private survey showed on Monday, 2 April 2018. The Caixin/Markit Manufacturing Purchasing Managers' index (PMI) dropped to 51 in March from 51.6 in February. The weaker reading follows official data released Saturday, 31 March 2018 showing a rebound to 51.5 from February's holiday-affected 50.3.

China's tariffs would place 25% duties on major US exports to China including airplanes, autos and soybeans, covering 106 categories of products and affecting \$50 billion of goods. The announcement followed plans by the Trump administration to impose tariffs of 25% on Chinese products worth \$50 billion, on top of levies introduced on steel and aluminum last month.

German industrial output fell in February, data released on Friday, 6 April 2018 showed. Industrial output in adjusted terms fell 1.6% in February month-on-month after a 0.1% increase in January. Industrial output was up 2.6% from February 2017 in calendar-adjusted terms, although the pace of year-on-year growth slowed from 6.3% in January.

The US trade deficit rose 1.6% in February and remained near a 10-year high. The US trade deficit rose to \$57.6 billion in February from \$56.7 billion in the prior month, data released on Thursday, 5 April 2018 showed.

WEEK AHEAD

Macroeconomic data, Q4 results to provide direction

Macroeconomic data, trend in global markets, investment by foreign portfolio investors (FPIs) and domestic institutional investors (DIIs), the movement of rupee against the dollar and crude oil price movement will dictate trend on the bourses in the near term.
