Market Outlook

THE WEEK THAT WAS

Sensex, Nifty garner modest gains

Key benchmark indices logged modest gains in the week gone by after the central bank maintained its neutral stance. Sustained buying by domestic institutional investors also boosted sentiment.

In the week ended Friday, 8 June 2018, the Sensex rose 216.41 points or 0.61% to settle at 35,443.67. The Nifty 50 index rose 71.45 points or 0.67% to settle at 10,767.65.

The BSE Mid-Cap index rose 169.86 points or 1.07% to settle at 16,022.37. The BSE Small-Cap index fell 91.83 points or 0.54% to settle at 16,887.13.

On the macro front, the Nikkei India Services Business Activity Index fell to 49.6 last month from 51.4 in April. A reading below 50 indicates contraction in activity, while a number above it signals expansion. Services activity in the country fell below the 50-point-mark for the first time since February, when the Index reading stood at 47.8.

All the six members of RBI's monetary policy meeting have voted in favour of a rate hike, while maintaining a neutral stance on 6 June 2018. On the basis of an assessment of the current and evolving macroeconomic situation at its meeting, the Monetary Policy Committee (MPC) decided to increase the policy repo rate under the liquidity adjustment facility (LAF) by 25 basis points to 6.25%.

Consequently, the reverse repo rate under the LAF stands adjusted to 6%, and the marginal standing facility (MSF) rate and the Bank Rate to 6.50%. The decision of the MPC is consistent with the neutral stance of monetary policy in consonance with the objective of achieving the medium-term target for consumer price index (CPI) inflation of 4% within a band of +/- 2%, while supporting growth.

On the macro front, the Indian economy will see a robust GDP growth of 7.3% in 2018-19 and 7.5% for the next two as factors holding back growth in India fade, the World Bank has forecast. India's economy is robust, resilient and has potential to deliver sustained growth, Ayhan Kose, Director of the Development Prospects Group at the World Bank, told the media. Growth in India is projected to advance 7.3% in FY 2018-19 (1 April 2018-31 March 2019) and 7.5% in FY 2019-20, reflecting robust private consumption and strengthening investment, the bank said in its June 2018 edition of the Global Economic Prospect report. The report, released on Wednesday, 6 June 2018 is the global lender's flagship publication on the state of the world economy.

On the global data front, Japan's economy shrank at an annualized pace of 0.6% in the January-March quarter.

The Marit services purchasing managers index for the US in May rose to 56.8 from 54.6. The Institute for Supply Management services index rose to 58.6 in May from 56.8, while a reading of job openings rose to a fresh record in April, reaching 6.7 million after 6.63 million in March.

Initial jobless claims fell slightly in early June, keeping the rate of layoffs in the US near a 50-year low. Household wealth topped \$100 trillion for the first time in the first quarter, the Federal Reserve said. Consumer credit in April slowed to a seasonally adjusted annual rate of 2.9%, or \$9.3 billion, down from 3.8% in March.

US factory orders fell by 0.8% in April. The decline was concentrated in commercial aircraft. Orders for nondurable goods rose slightly. The increase in factory orders in March, meanwhile, was raised a tick to 1.7%.

The US trade deficit shrank 2.1% in April and tumbled to a seven-month low. Meanwhile, the productivity of American businesses rose at a revised 0.4% annual pace in the first quarter instead of 0.7% as originally reported. Output of goods and services produced climbed 2.7% instead of 2.8%, while unit-labor costs, or how much it costs to make each product, rose by 2.9%, a bit higher than the preliminary 2.7% estimate.

WEEK AHEAD

Global cues to dictate market trend

Macroeconomic data, progress of monsoon, trend in global markets, investment by foreign portfolio investors (FPIs) and domestic institutional investors (DIIs), the movement of rupee against the dollar and crude oil price movement will dictate trend on the bourses in the near term.

On the macro front, the government will announce industrial production data for April 2018 on Tuesday, 12 June 2018. India's industrial output grew 4.4% year-on-year in March 2018, following a downwardly revised 7% advance in the previous month.

The government will announce inflation data based on wholesale price index (WPI) for May 2018 on Thursday, 14 June 2018. Wholesale prices in India rose by 3.18% year-on-year in April 2018, after a 2.47% gain in the prior month.

Globally, investors are awaiting the outcome of the Group of Seven summit. Also the US Fed, European Central Bank (ECB) and Bank of Japan's policy meets next week will be closely watched. US President Donald Trump is scheduled to meet with North Korean leader Kim Jong Un for a historic summit in Singapore on Tuesday, 12 June 2018. The key discussion will be the possible dismantling of North Korea's nuclear program.

Investors are also closely watching developments in the ongoing G7 summit which started in Canada on Friday, 8 June 2018 for more signs on the trade tensions and tit-for-tat tariffs.

On the global data front, China releases its May data for industrial production, retail sales and fixed asset investment on Thursday, 14 June 2018. On the same day, the US will see numbers for inflation, retail sales, industrial production, consumer sentiment and the Empire State index.

On Wednesday, 13 June 2018, The US Federal Reserve ends a two-day meeting with a decision on interest rates and a statement on the economy. The central bank is widely expected to raise its target short-term interest rate for the second time this year. The Federal Reserve left its target range for the federal funds rate steady at 1.5-1.75% during its May 2018 meeting, in line with market expectations.

On Thursday, 14 June 2018 ECB Governing Council meeting will be followed by interest rate announcement. On Friday, 15 June 2018, Bank of Japan holds monetary policy meeting.

Technical View

Nifty Outlook (10767) : Markets extended winning streak to the third consecutive week as Nifty ended above the 10,750 levels. Sentiment got a fillip after the Reserve Bank of India retained its neutral policy stance raising hopes that probably there would be no more rate hikes in the near future. During the last week Nifty has made a higher bottom formation and closed above 20 DEMA of 10660. Its immediate support is likely to be seen around 10650 and 10530 for next week. Its resistance is likely to be seen around 10790 and 10900 for next week.

Bank Nifty Outlook (26451) : During the last week Bank Nifty has made a high of 27047 and given a correction from this level up to 26069 and took support at 20 DEMA of 26163 on closing basis and given a bounce from this level up to 26767. Its support is likely to be seen around 26200 and 25950 for next week. Its resistance is likely to be seen around 26700 and 27100 for next week.

USDINR Outlook (67.73) : During the last week USDINR has made a low of 67 and given a bounce from this level up to 67.92. Its resistance is likely to be seen around 67.90 and 68.50 for next week. Its resistance is likely to be seen around 67.40 and 67 for next week.

EURINR Outlook (79.61) : During the last week EURINR has given a bounce from 78.51 to 79.92. It is facing a 50 DEMA resistance of 79.90. Closes above this level next resistance is likely to be seen around 80.50 and 80.90 for next week. Its support is likely to be seen around 79.30 and 78.90 for next week.

Dollar Index Outlook (93.53) : During the last week DX has made a lower top formation and closed at 20 DEMA of 93.50. Its support is likely to be seen around 92.90 and 92.50 for next week. Its resistance is likely to be seen around 93.90 and 94.50 for next week.
