Market Outlook

THE WEEK THAT WAS

Market registers small gains

Key benchmark indices logged small gains during the week characterised with high volatility. Gains triggered by sustained buying by domestic institutional investors were mostly offset by escalating trade spat between the US and China. However, small and mid-cap indices underperformed the Sensex during the week.

In the week ended Friday, 22 June 2018, the Sensex rose 67.46 points or 0.19% to settle at 35,689.60. The Nifty 50 index rose 4.15 points or 0.04% to settle at 10,821.85. The BSE Mid-Cap index fell 161.59 points or 1.01% to settle at 15,839.61. The BSE Small-Cap index fell 421.32 points or 2.48% to settle at 16,539.84.

Meanwhile, the Reserve Bank of India (RBI) on Wednesday, 20 June 2018, released the minutes of the Monetary Policy Committee (MPC) meeting held between 4-6 June 2018. All six members of the MPC maintained their neutral policy stance and also voted in favour of a repo rate increase of 25 basis points to 6.25%, revealed the minutes of the meeting.

According to the minutes, RBI governor Urjit Patel said inflation risks have increased since the April policy. Patel, therefore, voted for an increase in the policy repo rate by 25 basis points. In view of prevailing uncertainties, it is apposite to maintain the neutral stance so as to respond to the evolving situation in a flexible manner, he added.

Among the internal members, deputy governor Viral Acharya said that there were considerable uncertainties around oil and food prices as well as the playing out of trade wars and global financial market outcomes, and voted for continuing with the neutral stance. The third RBI member Michael Patra pushed for front-ending rate hikes on the grounds that there is a closing sliver of opportunity to do so.

The India Meteorological Department (IMD) in its weather report on 21 June 2018 said that for the country as a whole, cumulative rainfall during this year's monsoon from 1 to 20 June been 7% below the Long Period Average (LPA). The June-September southwest monsoon is critical for the country's agriculture because a considerable part of the country's farmland is dependent on the rains for irrigation.

On the global front, Eurozone finance ministers agreed to ease Greece's debt burden when the country's bailout ends in August. Greece now has another 10 years to pay back almost €100 billion (\$116 billion) of loans, about half the bailout total since 2010, and to lend another €15 billion, in part to help build a cash buffer.

The Bank of England (BOE) left its key interest rate at 0.5% in an announcement Thursday following a regular meeting, as British inflation holds at a 14-month low. BOE policymakers voted 6-3 to keep the rate on hold. The bank also voted unanimously to maintain its quantitative easing stimulus policy, under which it has pumped £445 billion (\$586 billion, 506 billion euros) around the UK economy.

Japan logged its first trade deficit in three months in May on a surge in imports of aircraft and aircraft engines from the United States, data from Japan's finance ministry showed Monday. Japan posted a trade deficit of 578.3 billion Yen in May.

Trump administration last week said it will impose a 25% tariff on a list of 818 items of Chinese goods worth around \$34 billion beginning 6 July. Measures affecting an additional 284 products worth \$16 billion will be subject to review before taking effect.

In response, China said a 25% tariff will be implemented on US goods, including soybeans and electric vehicles, worth \$34 billion starting 6 July. Another list of US imports worth \$16 billion will be subject to review before being applied.

The Philadelphia Fed's manufacturing index slowed sharply to a reading of 19.9 in June from 34.4 in May.

The US current-account deficit increased to \$124.1 billion (preliminary) in the first quarter of 2018 from \$116.1 billion (revised) in the fourth quarter of 2017, according to statistics released by the Bureau of Economic Analysis (BEA). The deficit was 2.5% of current-dollar gross domestic product (GDP) in the first quarter, up from 2.4% in the fourth quarter.

WEEK AHEAD

F&O expiry may keep market volatile

The expiry of June futures & options (F&O) contracts, progress of monsoon, global macroeconomic data, trend in global markets, investment by foreign portfolio investors (FPIs) and domestic institutional investors (DIIs), the movement of rupee against the dollar and crude oil price movement will dictate the trend on the bourses next week.

Trading could be volatile next week as traders roll over positions in the F&O segment from the near month June 2018 series to July 2018 series. The June 2018 F&O contracts expire on Thursday, 28 June 2018.

Progress of monsoon will be watched. The India Meteorological Department (IMD) in its weather report on 21 June 2018 said that for the country as a whole, cumulative rainfall during this year's monsoon from 1 to 20 June has been 7% below the Long Period Average (LPA). The June-September southwest monsoon is critical for the country's agriculture because a considerable part of the country's farmland is dependent on the rains for irrigation.

Geopolitics will remain in focus and developments in trade spat between the US and China will be closely watched.

On the global front, Japan Consumer Confidence index for June will be declared on 29 June 2018. In US, Durable Goods Orders for May will be declared on 27 June 2018. The final Q1 GDP growth rate will be declared on 28 June 2018.
